ORBIS YACHT  
Premium Communications

## WIFI Service

Broadband access to areas not covered by optical fiber can be reached through the installation of satellite stations and managed through control of the end user links with Wi-Fi or Wi-Max. Likewise, this service can also be adopted, at low costs, to provide data and voice (VOIP) communications in the areas covered by the service. Orbis Yacht can integrate its own satellite solution in the Wi-Max solution offering the same great result - wireless access to dynamic broadband connections in any sector.

- > Possibility to manage, control and limit bandwidth
- > User and user groups profile setting (Data traffic, priority, time, etc.)
